## Juncus tenuis 'Blue Dart'

### Blue Dart Color Grass

Blue foliage of this rush is ornamentally attractive. Pond/stream margins. Rock gardens. Ground cover. Interesting addition to combination containers.

Easily grown in consistently moist to wet soils in full sun. Tolerates light shade, but performs best in full sun. Tolerates heavy soils. Needs ample moisture, but also does surprisingly well in slightly moist soils that do not dry out.

## Carex flacca 'Blue Zinger'

### Blue Sedge

Thrives in moist soils, but established plants also perform well in average garden soils with some moderate tolerance for drought. In late spring or early summer, has cream-colored flower spikes among the foliage.

Mass or group in woodland gardens, shade gardens, borders or rock gardens. Also a great ground cover, edging plant, along walkways, and low spots.

# Schizachyrium scoparium 'Chameleon'

## Chameleon Little Bluestem

-This little grass is a color-changing spectacle in the garden. Upright narrow leaves emerge striped green and cream before developing pink to light purple tips. Spiky pink blooms emerge in late summer lasting through the winter.

-Perfect for small spaces, rock gardens, borders, and container gardens.

## Ophiopogon japonicus 'Nana'

### Dwarf Mondo Grass

-Noted for its small size and attractive evergreen foliage, this small perennial forms dense tufts of arching, strap-shaped, dark green leaves. Insignificant white flowers emerge in summer before giving way to blue berries.

-Great for beds and borders, edging, groundcover, underplanting shrubs, and city gardens.

## Carex oshimensis 'Everillo'

### Japanese Sedge 'Everillo'

Landscape uses include beds, borders, rock gardens, ground cover, or edging a pathway. This plant is an excellent choice to brighten shady areas, and does well in containers.

Grows best in full sun or part shade, and does well in moist, fertile, well-drained soils. Best foliage is obtained in part shade rather than in sun. Do not let the soil dry out completely.

## Acorus gramineus 'Ogon'

### Golden Sweet Flag

Mass as a ground cover in small areas of water gardens, along streams or ponds, bogs or in moist open woodland gardens. Helps control erosion on water banks. Also effective in rock gardens, border fronts, foundations or as small landscape accents.

Easily grown in average, medium to wet soils in full sun to part shade. Plants perform well in both boggy conditions (including shallow standing water to 3-4" deep) and consistently moist garden soils.

## Pennisetum aloecuiroides 'Lemon Squeeze'

### Lemon Squeeze Fountain Grass

-This brightly colored ornamental grass is perfect for adding contrast in your garden with its chartreuse gold leaves, with no burning in the sun. Copper panicles appear above foliage and provide additional interest to this three seasons grass.

-Great for borders, containers, cut and dried flowers, mass plantings, and specimen plantings.

## Miscanthus sinensis 'Gracillimus'

### Maiden Grass

-This spectacular ornamental grass is grown for its abundant, purple-flushed, flower plumes on display in late summer. The plumes change to silver as they mature and provide excellent winter interest.

-Perfect for use in screens, hedges, mass plantings, and as an accent plant.

# Schizachyrium scoparium 'Standing Ovation'

## Standing Ovation Little Bluestem

-This vibrant grass boasts a blue-green summer foliage that transforms into stunning shades of purple, orange, and red in fall. In late summer to early fall, small, airy flowers add a delicate texture to the plant, before maturing into small seed heads that persist through the winter.

-Perfect for erosion control on banks and slopes, beds and borders, and natural landscaping.

## Miscanthus sinensis 'Variegatus'

### Variegated Miscanthus

-This large ornamental grass has white and green striped foliage, with white being the predominant color. Foliage fades to tan after frost.

-Tiny reddish flowers appear in tassel-like inflorescences which rise above the foliage clump in September, gradually turning into silvery plumes in fall as seeds mature. Plumes persist into winter.

-Perfect for accent plantings, borders, and specimen plantings.
