

Camellia sasanqua 'Alabama Beauty'

Alabama Beauty Camellia

An excellent choice for a border, accent, privacy/screen planting, cut flowers, espalier, cottage gardens, and woodland gardens. As most summer flowers are finishing up this Alabama Beauty is just getting started.

One of the first to flower in the fall with semi-double blooms that can reach up to 4"-5" across.

Even though camellias adapt well to different soil types, they prefer moist, but well-drained acidic soil rich in organic matter. Consistently soggy soil is a slow killer to these plants.
