

Callicarpa americana

American Beautyberry

Often used in the back of a shrub border, plant beds, informal and cottage gardens.

Open growth habit that produces violet to magenta colored fruit that attracts bees, birds, and butterflies!

Plant in well draining sandy, or clay soil with organic matter. A full sun to part shade lover, but the best flowering production happens in full sun.

Viburnum trilobum Redwing American Cranberrybush

Can be used in the landscape in shrub borders, hedges and screens, foundation plantings, and as a specimen plant. Lacey white flowers appear in spring, and are loved by pollinators. In late summer, the blooms give way to clusters of ornamental bright red berries that often persist from fall through early winter, and are popular among birds and other wildlife. The foliage turns a brilliant red in the fall.

Easily grown in average, moist, well-drained soils, and is drought and clay soil tolerant.

Buxus microphylla var. japonica 'Baby Gem'

Baby Gem Boxwood

This plant is perfect for small gardens and focal points with its small stature and delicate leaves. Since it's evergreen, this shrub will always stand out in the winter months. Try growing these into a small garden path border for a natural hedge that outlines the path year round. These bushes are also great in mass plantings because of the small size and ease of care.

Prune the Baby Gem Boxwood in the spring, when new growth is emerging. You can grow these into well manicured hedges or other shapes, including topiaries. Or you can allow these shrubs to grow without trimming, for a more natural look all year round.

Platycodon grandiflorus 'Mariesii'

Balloon Flower

Balloon flower is a clump-forming perennial that is so named because its flower buds puff up like balloons before bursting open, and blooms throughout the summer. Deadheading spent flowers generally prolongs the bloom period.

Best grown in light, medium moisture, organically rich, well-drained loams in full sun to part shade. Avoid wet or poorly-drained soils. Division and transplanting are possible but tricky because of the fragile, fleshy root systems of these plants, and it is probably best to leave plants undisturbed once established.

Ligustrum japonicum 'Recurvifolium'

Waxy Leaf Privet

This plant makes a wonderful foundation plant, privacy screen, a hedge, or even a container.

Has lustrous dark green leaves, wavy foliage, and fragrant white flowers.

Prefers alkaline soil and is pollution, sun, and shade tolerant, as well as cold hardy. It tolerates dry conditions and is intolerant of wet soils.

Hibiscus syriacus 'White Chiffon'

White Chiffon Rose of Sharon

Excellent flowering shrub that may be massed, planted in groups or used as a specimen. Good for foundations and shrub borders. Also can be effective as a hedge or screen.

May be trained into a small tree form.

Easily grown in average, medium moisture, well-drained soils in full sun to part shade. Best flowering occurs in full sun. Prefers moist, organically rich soils, but tolerates poor soils and some drought. Very tolerant of summer heat and humidity.

Weigela florida 'Wine and Roses'

Wine and Roses Weigela

Prune blooms on old wood - prune as needed after flowering. Remove oldest stems every 3-5 years to encourage vigorous juvenile growth.

Adapts to any well-drained site. The rich, dark purple foliage maintains its vibrant color throughout the summer

A good choice for shrub borers, perennial borders, hedge plantings, specimen plantings, and foundations.

Jasminum nudiflorum

Winter Jasmine

-This medium-sized shrub has long arching branches with willowy green stems that stand out in late winter or early spring when clothed with masses of bright yellow flowers appearing before the shiny green trifoliate leaves unfurl.

-Perfect for arbors, pergolas, trellises, banks and slopes, ground covers, and walls and fences.
